EPDM RUBBER SHEET
Heat Resistant | Chemical Resistant | UV & Ozone Resistant | Fire Resistant

Overview
Duratuf EPDM Rubber Sheet is a black rubber sheet made from Ethylene Propylene Diene Monomer, commonly known as EPDM. It has high temperature resistance and chemical resistance to acids and alkalis. It is UV stable making it highly resistant to ozone effects and extreme weather conditions and is ideal for long term outdoor applications.

Our EPDM Rubber Sheet has excellent physical properties and is resistant to hot water and steam. It is suitable for prolonged exposure to aquatic environments and will not deteriorate when submerged in fresh or sea water making it suitable for marine applications. We also offer special Fire-Resistant EPDM Rubber Sheet Grade which has low smoke and low toxicity. Our EPDM Sheet is available in a variety of choices depending on its hardness, specific gravity, colour, fire resistance, mechanical properties & surface finish.

Cut lengths, strips, custom shapes, surface finish and colours are available upon request

Note: Manufacturing tolerance of ± 10% on thickness, ± 5% on length & ± 2% on width shall be applicable

Applications
Duratuf EPDM Rubber Sheet has been designed primarily for use as a flexible strip, pad, lining or gasket and is mainly used for Sealing, Insulating, Isolating and Protecting steel or other surfaces. Its properties make it suitable for a number of applications including:

- Flange gaskets on pipes and tanks
- Lining of pipes and tanks
- Transfer and joining sleeves
- Weatherproof flashing
- Insulating strip
- Isolation barriers
- Heat resistant skirting rubber
- Heat resistant belt scrapers
- Dust covers
- Variety of underwater applications
